• Shebok 141/A, Raynagar, Sylhet-3100, Bangladesh

Skills

Technologies: Node.js | TypeScript | Python | GO | MongoDB | MySQL | PostgreSQL | GraphQL | Elasticsearch | Nuxt | PHP
DevOps: AWS | Docker | Linux VPS
CI/CD: GitHub Actions
Miscellaneous: RabbitMQ | Socket.io | DSA

Experience

Senior Software Engineer **Feb 2023 - Present**

TECHNOVATIVE SOLUTIONS LIMITED | United Kingdom (Remote)

- Built a centralized database for real-time and historical disaster data, utilizing Python & GDAL for GIS file transformation via ETLs, enhancing data processing and storage accuracy.
- Designed a new event-driven architecture to support both legacy and modern services, enhancing system scalability.
- Implemented large file upload service (up to 500MB) by streaming to cloud storage and asynchronously decompressing using message queues.
- Integrated Ontology-Based Virtual Knowledge Graph with the centralized database to provide real-time data access.
- Created a SPARQL query builder for end-users, simplifying the process of building queries dynamically.

Software Engineer **Feb 2022 - Mar 2023**

Dorik, Inc. | Sylhet, Bangladesh

- Developed RESTful and GraphQL APIs using Node.js and MongoDB, reducing bugs by 80% with end-to-end test coverage.
- Implemented Elasticsearch, reducing search query time by 30-35%.
- Built CMS features, including custom RSS feeds, sitemaps, membership management, and client billing functionalities.
- Created serverless AWS Lambda functions to handle webhooks, improving platform automation and responsiveness.

Software Engineer **Jan 2021 - Jan 2022**

Syntaxive | Sylhet, Bangladesh

- Designed and developed web applications using Nuxt.js, Adonis.js, and MySQL.
- Reduced query time by 20% through codebase refactoring and optimization.
- Developed real-time chat applications using Socket.io.
- Configured remote servers for application deployment using LEMP stack.

Software Engineer **Mar 2019 - Dec 2020**

Appifylab | Sylhet, Bangladesh

- Developed interactive websites utilizing Nuxt.js for frontend development, Adonis.js for backend development, and MySQL for database management.
- Implemented REST APIs to support mobile applications and websites, while also monitoring their performance and functionality.

Education

B.Sc (Hons.) in CSE **Jan 2015 - Jan 2019**

Leading University | Sylhet, Bangladesh

- CGPA of 3.35 out of 4.
- Developed a real-time bus tracking system using Node.js, Socket.io, and Google Maps API.

Certifications

LICT Top-Up IT Training on Android Development (NESSCOM IT-ITES Sector Skill Council) **Oct 2017 - Feb 2018**

Microsoft - Young Bangla Internship Program **Jan 2018 - Mar 2018**

Organisation

Vice President & ACM Workshop Coordinator **May 2018 - Oct 2019**

Leading University Computer Club | Sylhet, Bangladesh

- Organised programming activities such as workshops, tech lectures, hackathons, and coding challenges.
